About Me

A Full Stack Developer specializing in PHP and Laravel, backed by a strong academic foundation (GPA: 3.82). Experienced in designing and developing efficient Management Information Systems and dynamic web applications. Possesses a deep understanding of programming logic sharpened through a role as a Teaching Assistant, and highly proficient in using Git and GitHub for team collaboration.

Education

2022 - 2025 | Tunas Bangsa Academy Information | Informatics Management |

- Final Project: "Web-Based Management Information System for TPA Student Attendance Using Laravel 12 (Case Study: Nurul Haq Mosque, West Jakarta)"

2019 - 2022 | Tanjung High School West Jakarta| office administration

Work Experience

January - June 2026 | Fullstack Developer | PT Cakrawala Parama Internasional

- Multi-Role & Multilingual CMS: Designed and developed Laravel 12 and Vue 3-based RESTful APIs secured with Laravel Sanctum, and implemented a bilingual approval workflow tailored specifically for Director roles.
- Query Optimization & Data Caching: Optimized MySQL database structures for interactive content and implemented a short-term caching mechanism for article view counts to minimize direct database query loads.
- Comprehensive System Testing & QA: Executed thorough functional testing (White-box and Black-box testing) on API endpoints and front-end error handling to ensure strict data validation and a production-ready, bug-free application.

September 2024 – Present | Lead Coordinator & IT Support | TPA Nurul Haq Mosque

- Operational Leadership: Lead daily operations of the educational institution, including scheduling teaching sessions, managing student data, and evaluating learning performance.
- Administrative Digitalization: Initiated and manage the web platform (tpanurhaq.com) to digitalize administrative tasks, streamlining schedule recaps and attendance tracking for both teachers and students.
- Technical & System Maintenance: Independently handle technical issues and hosting maintenance to ensure continuous, uninterrupted access to the educational platform for all users.

Juli 2025 - Sekarang | Asisten Dosen | Akademi Teknik Informatika Tunas Bangsa

- Mentoring Fullstack & Logika Pemrograman: Membimbing dan mentransfer pengetahuan kepada 10+ mahasiswa mengenai logika pemrograman dasar serta implementasi Fullstack Web Development (PHP, MySQL, Bootstrap).
- Code Review & Standar Clean Code: Secara aktif melakukan peninjauan kode (code review), membantu proses debugging/troubleshooting, serta mengajarkan teknik clean code untuk memastikan aplikasi mudah dipelihara.
- Analisis Sistem & Workflow Modern: Mengarahkan mahasiswa dalam perancangan arsitektur sistem (Flowchart, DFD, ERD), penggunaan Git/GitHub untuk kolaborasi tim, serta pemanfaatan AI tools guna efisiensi coding.

March – May 2025 | Full-Stack Developer Intern (Laravel) | PT Radar Teknologi Komputer

- Architecture & Core Features: Designed and built a dynamic portfolio website architecture using Laravel 12, implementing optimized CRUD functionalities.
- Data Visualization Modules: Developed custom web modules for environmental data visualization (Case Study: South Coast Marine Pollution) to ensure data is presented informatively to the public.
- Quality Assurance & Deployment: Conducted thorough Black-box testing and code debugging prior to deployment, significantly reducing error risks in the production environment.

Best Projects

Mosque & Organization Management Information System | Laravel 12, MySQL, Tailwind CSS

- **Integrated Management System:** Developed an integrated management system (small-scale ERP) comprising Finance (Cash Flow & Donations), Asset Management, and News CMS modules, successfully replacing manual record-keeping.
- **Security & System Stability:** Strengthened system architecture by implementing multi-guard authentication, integrating external REST APIs for prayer schedules, and applying automated testing (Feature & Unit tests) to ensure application stability.

Academic Information & Student Monitoring System | Laravel 12, MySQL, Tailwind CSS

- **All-in-One Digital Platform:** Developed an all-in-one school digital platform comprising Daily Attendance, New Student Admission (PPDB), and Schedule Management modules, successfully replacing paper-based administration.
- **Monitoring & Reporting Architecture:** Implemented a Student Character Monitoring system (Point & Behavior Scoring), automated PDF report generation for grade and attendance recaps, and multi-role access control to secure Admin, Teacher, and Student data.

Company Profile CMS | Laravel 12, MySQL, VueJS

- **API Architecture & Multi-Role Auth:** Designed RESTful APIs using Laravel Sanctum and implemented Role-Based Access Control (RBAC) to securely isolate access privileges between the Admin Panel and the Director dashboard.
- **CMS & Content Workflow:** Built article CRUD functionalities featuring automated unique slug optimization, content status management (Draft/Pending/Publish), and a dedicated Director approval workflow prior to publication.

Organization

2022 – Present | Head of Risnha | Nurul Haq Mosque

- **Organizational Leadership:** Hold full accountability for leading the core team in designing and executing annual work programs focused on youth character and community development.
 - **Event Management:** Manage the end-to-end planning and execution of various social and educational events, including budget allocation and logistical coordination.
 - **Strategic Problem Solving:** Serve as the primary decision-maker in resolving internal organizational issues and act as the main liaison to bridge communication between the Mosque Management (DKM) and youth members.
-

SKILLS & TOOLS

- **Programming & Frameworks:** PHP, Laravel, React.js, JavaScript, HTML/CSS, Bootstrap, Tailwind CSS.
- **Database & Integrations:** MySQL, RESTful API, Postman, Midtrans (Payment Gateway).
- **Development Tools:** Git, GitHub, VS Code, AI-Assisted Development, Figma (UI/UX).
- **Soft Skills & Others:** Public Speaking, Team Management, Mentoring, Microsoft Office.
